

PLT® Mini Launching Unit Black

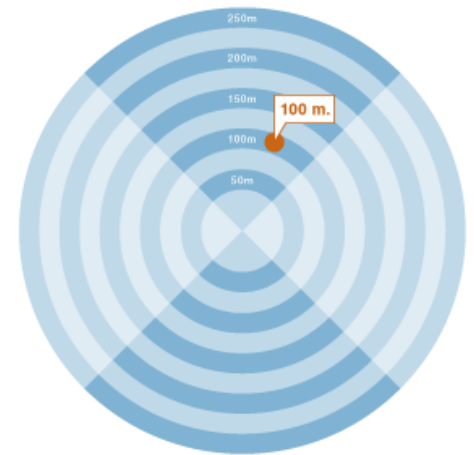

The PLT® Mini system consists of a launching unit, several types of projectiles and a launching tube.

Article 4021

PLT® Mini Launching Unit Black

1

The Launching Unit can operate on either disposable 33 grams CO2 cartridges or compressed air from a high-pressure air cylinder. CO2 is commonly used during operations for easier maneuvering

Operations

Light-weight operations onboard small vessels or where maneuverability is essential. Typical users are rescue, police and naval operators.
